B2B / B2E
Regulated Verticals
Value proposition

New user

Identity verification
Simplified *identity* and document verification with automated *facial comparison* and *video identification*.

KYC and AML compliance for reduced *risk of fraud*.

Identity authentication
Dynamic *identity verification* combining behavior, possession, knowledge and inherence, based on calculated risks.

Identity provider
A *unique identity* for each person, used *everywhere*, with centralized *governance* and compliance management.

Our *Unified Identity Management* approach provides a *customer centric mobile first one-stop-shop* digital identity lifecycle manager focused on B2B and B2E regulated verticals.
How to effectively **verify** and **authenticate** a digital person?

How to effectively **share** a digital person’s **identity**?
Who we are
